Messages and Codes - EOR1001 - EOR1300

This subsection covers the following topics:

- Displaying a Long Message Text
- Messages EOR1001 - EOR1300 in Numerical Order

Displaying a Long Message Text

To display a long message text

- Use the direct command

> **HELP MSG <message-code>**

Messages EOR1001 - EOR1300 in Numerical Order

Message	Explanation	Action
EOR1002 - Line Command is invalid here	The selected line command is not applicable for this line.	Enter a valid line command.
EOR1009 - Invalid Subnetwork Definition		
EOR1010 - Please enter a Natural Library Name	The function requires the name of a Natural library.	
EOR1012 - Natural Library Name too long (maximum 8 characters)	A Natural library name must not be longer than 8 characters.	Enter a valid Natural library name.
EOR1015 - Volume Serial Number not required	A volume serial number is required if and only if the JCL resides on an uncataloged data set.	Correct or delete VOLSER field.
EOR1022 - The Date Format is:1:	An invalid date format was used.	Enter the date in the format displayed.
EOR1026 - Please specify a month list with a day list (optional)	A month list can be used together with a day list.	
EOR1027 - Please specify a month list with weekdays (optional)	If weekdays are specified, a month list can be specified, too.	
EOR1029 - Job Network successfully added	The job network is now defined in the database.	
EOR1032 - Name must start with a character		Correct error.
EOR1033 - Date Format is:1:	This message is shown if an error occurs during the processing of an input date field.	Correct error.

EOR1034 - No Jobs activated for Network	A network activation was executed, but no jobs were activated. Possible reason: No jobs were defined for this network.	Check the job network definition.
EOR1035 - Job Network:1:not found	The job network is not defined for the current owner.	Correct error.
EOR1036 - Job:1:not found	1. The job is not defined in the current job network. 2. The job number or job name could not be found in the operating system active jobs or spool queue.	Correct error.
EOR1037 - Job Network definition has been modified	The job network definition modification was successful.	
EOR1038 - No Jobs found	No jobs have been found for the current selection.	
EOR1042 - Job Network :1: activated	The job network is now copied to the active database. It can be identified by an unique run number.	
EOR1043 - No Dataset Name or Library required for Dummy or Cyclic Jobs	Dummy or cyclic jobs have no JCL.	Leave Library Name field blank.
EOR1044 - No Member required for Dummy or Cyclic Jobs	Dummy or cyclic jobs have no JCL.	Leave Member field blank.
EOR1047 - Job disappeared from the active queue	The job can no longer be found in the Entire Operations active database.	
EOR1048 - No events have been found for which the job is waiting.	The job is not waiting for any prerequisite.	
EOR1049 - Owner :1: not defined		Correct owner.
EOR1051 - Object not in the Library	The object could not be found in the specified Natural library or PDS. This is a warning only. Entire Operations will accept the job definition.	Select an existing object, or create a new one with the specified name. If there is no object when the job runs, an execution error will occur.
EOR1052 - Library is empty	The specified Natural or PDS library contains no members.	Correct error.
EOR1053 - Object has invalid type	For Natural userexits, only the type 'subprogram' is allowed.	
EOR1058 - Enter Reference or Run Number, not both	Only one of both field may be used.	Correct error.

EOR1059 - Definition of Recovery not permitted for OK completion.	Recovery actions for a job may only be specified for the case, that the job ends not ok.	Correct error.
EOR1060 - Invalid Schedule Type	See the screen or field level help for valid schedule types.	
EOR1062 - Date Flag: empty, A (after), B (before), - (exclude)	A schedule date can be flagged with a letter, to indicate that the previous (B) or next (A) workday shall be scheduled, if the given date falls on a holiday. '-' (minus sign) indicates, that the specified date shall be be excluded from the scheduled dates. With this option, exceptions from periodic date lists can be defined. Examples: 10.03.89A Use next workday, if holiday. 16.04.88 Use this date, or do NOT schedule, if holiday. 11.05.89- Exclude this date from scheduling.	Correct or remove schedule date flag.
EOR1063 - Invalid day specification	Please use the field-level help to see examples for a valid day specification.	Enter a correct day specification or clear the field.
EOR1070 - Still active Jobs or Activations	The Job Network deletion was aborted, since one or more active jobs or planned activations of it have been found. A Job Network can be deleted only if there is no copy of it in the active database, and if all planned activations were removed.	Deactivate the job network on the active database before deleting the job network definition.
EOR1072 - Job :1: activated	A single job has been activated manually, and will be submitted and supervised by the Entire Operations Monitor.	
EOR1073 - Job :1: Activation cancelled	The job activation has been cancelled or interrupted for some reason.	Retry the activation with correct values.
EOR1074 - Job:1:is already active	The job with this job number or operating system name has already been activated. This activation was interrupted.	
EOR1075 - Job:1:JCL Check	The job has been submitted for the purpose of JCL checking only. This is not a real execution.	
EOR1076 - JCL Check only immediately	A job network or single job may be 'submitted' for JCL checking only. No delayed activation may be defined for this case.	Do not modify the date and time fields if JCL check is selected.
EOR1079 - 'Restartable' not possible for:1:	The feature 'restartable' can not be defined for the execution operation system of this job. The field has been set to 'N' (no).	
EOR1080 - Job Network Defaults inserted	If default values are defined for a whole job network, they will be inserted for empty fields for a new job definition, or on request for an existing job definition. The inserted defaults may be overtyped.	
EOR1081 - Default value for SHARE SYSOUT inserted	The value for the field SHARE SYSOUT was copied from the Entire Operations defaults.	

EOR1082 - Default value for MEMBER TYPE inserted	For the JCL location LMS (BS2000), the member type J (JCL) was inserted as default.	
EOR1083 - Defaults for SYSOUT / SYSLST inserted		
EOR1086 - The time format is HH:MM		Correct error.
EOR1091 - Use 'Number Activations' or 'Activate at', not both	Only one of these fields may be specified.	
EOR1092 - Number of Activations: Range is 2 through 999	Use a value in the allowed range.	
EOR1093 - Invalid Sysout selection criteria		Correct error.
EOR1094 - Invalid Sysout File Type (Allowed are SI, SM, SO, JL, or CC).	Sysout file (dataset) types: SM - System Messages SO - Sysout JL - Job Control Language CC - Condition Code Summary SI - Sysin	Correct error.
EOR1095 - File number must be numeric		Correct error.
EOR1096 - File number range must be n:n	Example: '1:2'.	Correct error.
EOR1097 - Invalid sysout file number		Correct error.
EOR1101 - User Routine not specified. Editing not possible.	The line command is not applicable for this line.	Correct error.
EOR1104 - Returncode or Quantity must be numeric		Correct error.
EOR1111 - Multiple Dependencies not possible	An input condition may be dependent on exactly one special check, such as file existence, or input condition user routine. If several special checks are to be defined, please use several input conditions.	Use several input conditions for several dependencies.
EOR1128 - Job Definition not complete	The job definition has not been completed yet. Obligatory fields were not defined. Addition Functions (e.g. editing, operating system specials) are allowed only if the main job definition is complete.	Complete the job definition, confirm it with 'Do' (PF5), and retry the desired function.
EOR1129 - Job Definition for :1: added		
EOR1130 - Job Definition modified		

EOR1140 - Dependencies found for:1:	The object (job, etc.) is dependent on another object. For a job, this means that it is connected to other jobs by any input or output condition.	If you want to delete the object, remove its dependencies first.
EOR1141 - No Dependencies found	The object is not dependent on other objects. For a job, this means that it is not connected to other jobs by any input or output condition.	
EOR1204 - Please enter 'A' (add) or 'D' (delete)		Correct error.
EOR1205 - Please enter the message destination		Correct error.
EOR1210 - Event already defined for Job	This event may be defined only once for a job.	Use the existing event definition to define end-of-job actions.
EOR1211 - Please enter a valid Event Code	Use the field help '?' to see the valid event codes.	
EOR1213 - Please enter the string to be scanned for	The string search has been defined to check thew event. A string must be entered.	Correct error.
EOR1215 - Only '/ANYSTEP' allowed here	Only the reserved name '/ANYSTEP' is possible for this event type. The defined event (e.g. JFL = job failed) can be determined on the job level only.	
EOR1216 - Invalid Event Type		Correct error.
EOR1218 - Entire Operations Library may not be used	The Library of Entire Operations itself is inhibited for User Routines.	Use another Natural Library.
EOR1220 - No Prose Text defined for the Event	It is possible to give a prose decription of any event in the end-of-job handling.	
EOR1222 - The quantity must be greater than zero		Correct error.
EOR1227 - Length range is 1 to 40		Correct error.
EOR1228 - Value is not alphanumeric		Correct error.
EOR1229 - Value is not numeric	If the value is really not numeric, use symbol type 'A' (alphanumeric).	
EOR1230 - Symbol 'Date' Format is YYYYMMDD	The symbol format 'D' (date) was specified. Only a valid date in the format YYYYMMDD will be accepted here.	Correct error.
EOR1231 - Invalid Symbol Format in Line:1:		Please correct the symbol value.
EOR1232 - Symbol out of Range, Line:1:	The symbol value is not in the range which is allowed for it. This message may be caused by a symbol value range check.	Correct the symbol value.

EOR1233 - Symbol Modification, Line:1:Error:2:	An error occurred during the modification of a symbol.	
EOR1260 - Enter Reference or Run Number, not both		Correct error.
EOR1270 - Same run for single Jobs only	Recovery may be performed under the same run number if it is a single recovery job, and if the recovery job belongs to the same network.	Enter a valid definition.
